

Scott B. Weingart

Chief Data Officer & Director, Office of Data & Evaluation
National Endowment for the Humanities, U.S. Government

352.537.8375

weingart.scott@gmail.com

scottbot.net

Elevating thoughtful experts with the resources they need to build a more connected, scientifically engaged, and culturally vibrant future.

Appointments

- 2023 - ongoing **National Endowment for the Humanities, United States Government**
Chief Data Officer
Inaugural Director, *Office of Data and Evaluation*
- 2023 - ongoing **University of Edinburgh**
Research Affiliate, *Centre for Data, Culture & Society*
- 2021 - 2022 **University of Notre Dame**
Inaugural Director, *Navari Family Center for Digital Scholarship*
Associate Librarian (Faculty), *Hesburgh Libraries*
Affiliated Faculty, *Lucy Family Institute for Data & Society*
- 2015 - 2021 **Carnegie Mellon University**
Inaugural Program Director of Digital Humanities
Assistant Librarian (Faculty), *Hunt Library*
Core Faculty, *Humanities Analytics*
Affiliated Faculty, *The Simon Initiative*
- 2014 **Stanford University**
Data Scientist, *Stanford University Libraries*
- 2009 - 2014 **Indiana University**
Research Associate, *Cyberinfrastructure for Network Science Center*
- 2006 - 2009 **University of Florida**
Research Assistant, *History of Science Department & Digital Library Center*

Education

Slowly pursuing the completion of a History of Science Ph.D.

- 2019 **M.Sc. Data Science**, School of Informatics and Computing, *Indiana University*
- 2009 **B.A. History of Science** (minor: Computer Engineering), *University of Florida*

Roles & Responsibilities

National Endowment for the Humanities, United States Government

Inaugural Chief Data Officer

Inaugural Director, Office of Data and Evaluation

NEH senior leadership team member responsible for evidence-informed decision making, and for keeping the U.S. public informed of the state, health, and value of the humanities.

Executive Leadership. Shapes data & evaluation policy impacting \$170 million in annual national humanities initiatives. Furnishes evidence to advise presidentially-appointed leadership. Ensures compliance through strategic planning, risk management, and related activities. Oversees clearinghouse for information on the state & value of the humanities.

Strategic Partnerships. Maintains strategic partnerships with other federal agencies, private philanthropies, and non-profits in alignment with clearinghouse mission. Represents NEH on federal chief data officer council. Supports data and evaluation capacity building across 56 State and Jurisdictional Humanities Councils. Builds coalitions and coordinates data activities within NEH and between agencies.

Program Management. Leads multimillion dollar grantmaking, cooperative agreement, and contract activities related to humanities data clearinghouse mission. Supports related evidence-gathering grantmaking initiatives across the agency.

University of Notre Dame

Inaugural Director, Navari Family Center for Digital Scholarship

Associate Librarian (Faculty), Hesburgh Libraries

Affiliated Faculty, Lucy Family Institute for Data & Society

- Served on Hesburgh Libraries' senior leadership administrative body, the Library Cabinet.
- Directed 11,500 ft², \$10+ million endowed research center with a technology lending library; data science support services; grant & fellowship programs; and specialized facilities including a makerspace, VR room, and dataviz wall.
- Supervised 15+ faculty, staff, postdocs, & students (including the heads of the Business & Architecture branch libraries with their own additional spaces and staff).
- Conducted, presented, and authored research at the intersection of data science & society.

Carnegie Mellon University

Inaugural Program Director of Digital Humanities

Assistant Librarian (Faculty), Hunt Library

Core Faculty, Humanities Analytics

Affiliated Faculty, The Simon Initiative

- Directed five-year, \$2 million project to make CMU a leader in the Digital Humanities
- Managed faculty, developers, students, interns, & other staff on dozens of projects.
- Administered internal grant and fellowship programs dispersing \$100k/year.
- Designed and implemented technical infrastructure supporting digital humanities across campus.
- Conducted, presented, and authored research at the intersection of data science & society.
- Taught data analysis, research methods, and history courses to students, faculty, & staff.

Highlights of Note

Service-Oriented Leader

Three-time inaugural director of initiatives that last. Builds teams and coalitions across sectors and disciplines that are mission-oriented, energized, and effective. Empathetic servant leader focused on maintaining the boring technical infrastructure that keeps the world running smoothly. Fueled by a passion for *everything*—from nature to culture and everything in between.

Interdisciplinary Historian of Science

Author of two books and dozens of articles spanning many disciplines (including folklore, science modeling, philosophy, history, biodiversity, computer vision, data visualization, data ethics, network science, archaeology, and web archiving) which leverage computation to illuminate the human experience. Collectively, these publications have accrued 3,500 citations, appeared on over 1,000 academic syllabi, and been translated into eight languages.

Recognized Expert in Field

Recipient of the Fortier Prize in Digital Humanities by the Alliance of Digital Humanities Organizations, and the Best Formative Initiative prize by La Asociación de Humanidades Digitales Hispánicas. Keynote speaker at international conferences. Principle investigator of or contributor to the securing of \$16 million in grants by organizations including the National Institutes of Health, the National Science Foundation, the National Endowment for the Humanities, the Getty Foundation, and the Andrew W. Mellon Foundation.

Community Contributor

Elected executive board member of scholarly societies and invited board member on several global cultural and research initiatives. Conference convener. Volunteer strategic planner and head of IT for local religious organizations. Maintainer of frequently used digital archival resources.

Performer

Professional performer and instructor of juggling and associated circus arts.

Experiences

Various & sundry:

- Historical & qualitative scholarship
- Digital archiving & preservation
- Evidence-informed grantmaking
- Financial management
- IT support / helpdesk
- Non-profit board participation
- Program evaluation
- Public speaking
- Scientific research
- Strategic planning
- Writing (journalistic, scholarly, & technical)

Technical Skills

A non-exhaustive hodgepodge:

- | | |
|-------------------------------------|--------------|
| - 3D modeling & fabrication | Beginner |
| - Agent-based modeling | Advanced |
| - Bayesian & frequentist statistics | Intermediate |
| - Citation analysis | Expert |
| - Cloud computing (AWS & Azure) | Intermediate |
| - Data governance | Advanced |
| - Data management | Advanced |
| - Data modeling | Expert |
| - Data security & cybersecurity | Intermediate |
| - Data visualization | Expert |
| - Database design & querying | Intermediate |
| - Deep learning (including “AI”) | Beginner |
| - Differential privacy | Intermediate |
| - Docker & Kubernetes | Beginner |
| - GIS & web mapping | Intermediate |
| - High performance computing | Beginner |
| - Machine learning & linear algebra | Intermediate |
| - Natural language processing | Advanced |
| - Network science | Expert |
| - Ontology development | Intermediate |
| - PowerBI & Tableau | Beginner |
| - Scientific coding (Python & R) | Intermediate |
| - Technical strategy | Advanced |
| - UX design | Intermediate |
| - Web coding (HTML, CSS, JS) | Intermediate |

Extended Biography

Scott B. Weingart is a leader, federal policy maker, and acclaimed scholar building a thoughtful future through human-centered technology. Before steering initiatives across academic and public sectors, he spent time as a historian of science, a librarian, a data scientist, and (this is true) a professional circus performer.

Weingart is the Chief Data Officer and Founding Director of the Office of Data and Evaluation (ODE) at the National Endowment for the Humanities (NEH). As part of NEH's senior leadership team, he oversees data operations, compliance, analysis, and strategy at the federal agency. Under Weingart's direction, the ODE **champions data-informed decision making at NEH and keeps the public informed on the state and impact of the humanities in the United States.** It does so through assessments of grant programs for equitability and impact; through activities reports to the federal government and the U.S. public; through direct grantmaking; and through ongoing partnerships with non-profit, governmental, research, and educational organizations.

Beyond his NEH work, **Weingart serves as a Research Affiliate with the University of Edinburgh's Centre for Data, Culture and Society;** a Library of Congress Copyright Public Modernization Committee Member; and an Advisory Board Member of the Posen Digital Library of Jewish Culture and Civilization.

Weingart formerly directed the University of Notre Dame's Navari Family Center for Digital Scholarship and Carnegie Mellon University's Digital Humanities program. In these roles, **Weingart led large teams pursuing and supporting the critical use of emerging technologies by scholars, librarians, and students across disciplines.** He also served in elected roles as a treasurer for the Alliance of Digital Humanities Organizations and an executive council member of the Association for Computers and the Humanities.

Weingart is a prize-winning author of dozens of books and articles who leverages computation to illuminate the human experience. *The Network Turn* (Cambridge

University Press, 2020)—co-authored with Ruth Ahnert, Sebastian Ahnert, and Nicole Coleman—is a manifesto for the adoption of network approaches and metaphors in the humanities. A special issue of the *Journal of Literary Theory* is dedicated to the book's central claim. *The Historian's Macroscope: Exploring Big Historical Data* (Imperial College Press, 2014)—co-authored with Shawn Graham, & Ian Milligan—is a popular introductory textbook for digital history which introduced the now-common term 'macroscope' to the digital humanities community, and it proved successful enough to warrant an updated edition in 2022 (with added author Kim Martin).

Weingart's research spans disciplines, including e.g., folklore, science modeling, philosophy, data ethics, history, biodiversity, data visualization, computer vision, network science, archaeology, and web archiving, and **his publications have been translated into Chinese, Dutch, French, Italian, Portuguese, Russian, Spanish, and Ukrainian.** The National Institutes of Health, the National Science Foundation, the National Endowment for the Humanities, the Andrew W. Mellon Foundation, and the Getty Foundation have all funded his work. For their pioneering research on representations of gender and the body in European fairy tales, the Alliance of Digital Humanities Organizations awarded the prestigious Paul Fortier Prize in Digital Humanities to Weingart and his colleague Jeana Jorgensen in 2011.

Weingart's career is unified by his commitment to a more equitable, ethical, impactful, and intellectually sound scholarly and cultural landscape.

Academic Books

peer reviewed

- 2022 Graham, S., Milligan, I., **Weingart, S.B.**, & Martin, K. (2022). *Exploring Big Historical Data: The Historian's Macroscopic, 2nd edition*. London: World Scientific Press. [10.1142/12435](https://doi.org/10.1142/12435) signif. revisions

Selected Teaching

Digital Humanities Literacy Course

Digital Humanities Graduate Seminar (76-911)

Introduction to Digital Humanities (76-429)

Data, Math, Visualization, and Interpretation of Networks for the Humanities

Information Visualization Graduate Course (S637)

Information Visualization Massively Open Online Course (S637)

Early Modern Scientific Revolutions

Selected Projects, Tools, Websites, &c.

Many scholarly projects are never intended for publication. A selection to which I have contributed appears below. ("Project Manager" is abbreviated PM.)

Accounting for Bias in Historical Data. Discover archival absence and statistically account for voices that are missing. PI

Bias in DH. Analyze gender, geographic, and topical bias in the digital humanities community. PI

Bibliometrics at CMU. Explore collaboration at CMU. PI

Digital Humanities Literacy Guidebook. Teaching DH to newcomers. PI
[10.1184/r1/10250381](https://doi.org/10.1184/r1/10250381)

Digits. Assess possible technical interventions to reduce the friction associated with publishing digital scholarship. PI

Finding the History & Philosophy of Science. Bibliometrically analyze the history and philosophy of science communities. PI

Punched Card Humanities. Research the early usage of computation in the humanities. PI

Republic of Letters. Reconstruct and analyze the correspondence networks underlying early modern science. PI

The Index of Digital Humanities Conferences. Create a website / digital archive making accessible the history of the digital humanities community. [10.34666/k1de-j489](https://doi.org/10.34666/k1de-j489) PI

The Last Tree. Create a website on the history of diagrams of knowledge. <http://last-tree.scottbot.net/> PI

Bridges of Pittsburgh. Find and beautifully present an efficient route through all the bridges in Pittsburgh. 10.1184/r1/8276171	Co-PI
CAMPI. Create a machine-learning augmented interface to aid archivists in the processing of large photography collections. 10.1184/R1/12791807	Co-PI
Gender and the Body in European Fairy Tales. Discover how early fairy tales described bodies in European fairy tales.	Co-PI
Introduction to Network Analysis and Representation. Create a website to help people understand fundamental aspects of network analysis. https://emeeks.github.io/networks/	Co-PI
Six Degrees of Francis Bacon. Mine, crowdsource, and present a social network of Early Modern Britain. 10.1184/dh/af729e	Co-PI
The Center for Midnight. Write a piece of fiction with students, AI algorithms, and best-selling novelist Robin Sloan. https://www.robinsloan.com/center-for-midnight/	Co-PI
Unlocking Digital Texts. Lay the groundwork for an Interoperable Text Framework, doing for text what IIIF does for images.	Co-PI
ePiStolarium. Create a resource for historians to explore early modern letters. http://ckcc.huygens.knaw.nl/epistolarium/	PM
Ethics & Artificial Intelligence. Understand how ethics is discussed in the context of artificial intelligence using text analytic techniques.	PM
ETHOS: Encyclopedia of the History of Science. Develop an online, open-access encyclopedia. https://lps.library.cmu.edu/ETHOS/	PM
Frankenstein Variorum. Create a new edition of Frankenstein, highlighting variations between early editions. https://frankensteinvariorum.github.io/	PM
Biography of a Course: Golf Analytics. Quantitatively analyze a half century of golf tournaments to learn the biography of a course. https://shiny.library.cmu.edu/golf/	PM
Janeway at CMU. Facilitate the launch of a CMU libraries journal platform,	PM
Mapping Gandhi. Create an interactive map charting Gandhi's social interventions in a region of India.	PM
Mining the Television Megatext. Analyze 1950s television through text and databases.	PM
Sci2 Tool. Create scientific software to analyze networks.	PM
Cascades, Islands, or Streams? Time, Topic, and Scholarly Activities in Humanities and Social Science Research. Research large-scale trends in scholarly activity.	Collaborator
Çatalhöyük Living Archive. Construct a browsable interface of an archaeological archive. https://sul-catalhoyuk-prod.stanford.edu/	Collaborator

Indiana Philosophy Ontology Project. Use text-mining and crowdsourcing to create an ontology of philosophy.	Collaborator
Josquin Research Project. Design data visualizations of medieval music.	Collaborator
Journal of Cultural Studies Retrospective. Research the history of the journal of cultural studies via computational means.	Collaborator
Kindred Britain. Design an interactive visualization of British family trees.	Collaborator
Latin American Comic Book Archive. Create an archive of important Latin American comics.	Collaborator
Network Workbench. Create scientific software to analyze networks.	Collaborator
Uncovering the Ancient Roman Economy. Construct a model of Ancient Roman bricklayer networks.	Collaborator
Beyond the Ant Brotherhood. Develop an online interface to Tolstoy's notes and letters. https://colloquy.us:8443/Tolstoy/	Contributor
Print & Probability. Discover anonymous printers of early books.	Contributor
Shakespeare-VR. Recording and presenting Shakespeare in virtual reality. https://shakespeare-vr.library.cmu.edu/	Contributor
Sports Celebrity. Analyze youth celebrity culture.	Contributor

Selected Contract & Consulting Positions

- 2023 **The Posen Library of Jewish Culture and Civilization.** Project scoping, metadata conceptualization, website redesign, & fellowship program development. 2021-2023.
- 2021 **Modernist Women Architects.** Network analysis consultant & developer. Vanderbilt University, 2020-2021.
- 2012 **Data-driven Ontology Development.** Text-mining consultant. NASA Atmospheric Science Data Center, 2012.
- 2011 **Cultures of Knowledge.** Data visualization & product consultant. Oxford University, 2011.
- 2011 **Huygens Institute.** Digital humanities, analytics, and data visualization consultant. Royal Library of the Netherlands, 2010-2011.

Selected Reviews & Related Consequents

- Six Degrees of Francis Bacon (Ongoing Online Project)**
- Renaissance and Reformation.** Dase, K. (10.33137/rr.v45i4.41385)
- Information Services & Use.** Urberg, M. (10.3233/ISU-200097)

Data integration enables global biodiversity synthesis (Proceedings of the National Academy of Sciences, 2021)

Faculty Opinions. Soltis, D. (10.3410/f.739496669.793582777)

The Network Turn (Cambridge University Press, 2020)

Avant. Hamarowski, B. (10.26913/avant.202209)

Journal of Literary Theory. (v. 17, n. 2) [Special issue inspired & framed by The Network Turn. See CFP: *Literary Theory and the Network Turn*]

Quaderni Storici. Wallnig, T., Ceserani, G., & Venturini T. (10.1408/106841) [Three reviews bundled into one issue; one per author.]

The Year's Work in Critical and Cultural Theory. Eccles, K. (10.1093/ywc&t/mbab014)

Representation at Digital Humanities Conferences (Bodies of Information: Intersectional Feminism and Digital Humanities, 2019)

Reviews of the full edited volume, of which our chapter is reviewed as a part.

American Literary History. Mendelman, L. (10.1093/alh/ajz051)

Contemporary Women's Writing. Ackermans, H. (10.1093/cww/vpab011)

Hypatia: A Journal of Feminist Philosophy. Smyth, H. (10.1017/hyp.2023.31)

Information, Communication & Society. Tsao, E. (10.1080/1369118X.2019.1690540)

Information Research. Pierce, R. (v. 24, n. 3)

The International Journal of Information, Diversity, & Inclusion. Betts-Green, D. (10.33137/ijidi.v4i2.33152)

Kairos: A Journal of Rhetoric, Technology, and Pedagogy. Kalodner-Martin, E. (v. 25, n. 2)

Seminar: A Journal of Germanic Studies. Baer, H. (10.3138/seminar.57.3.rev001)

The Historian's Macroscope (Imperial College Press, 2014)

ACRL CHOICE Reviews. (10.5860/CHOICE.196916)

Histoire sociale / Social History. Gaffield, C. (10.1353/his.2018.0011)

Reviews in History. Crymble, A. (10.14296/RiH/2014/1889)

Virtualis. Gayol, V. (v. 7, n. 13, p. 102-105)

Networks Demystified (Journal of Digital Humanities, 2011)

Music Reference Services Quarterly. Giannetti, F.

By The Numbers

Over my academic career, my fifty or so publications have accrued 3,500 citations, appeared in over a thousand academic syllabi, and been translated into and published in eight other languages. Prior to my federal service, I directly brought my institutions \$1.2 million in grant funds, actively supported an additional \$4.5 million in grant projects, and helped raise another \$10.6 million through supervisory and advisory support. More important than scholarly impact has been my public humanities work: dozens of digital projects, instructional materials, and public writings collectively viewed by millions and covered by major news outlets around the world.

My Erdős number is 3, and if I can't brag about that here, what even is the point of this comically long document?

My longest-running public project was a decade-spanning digital humanities blog, *the scottbot irregular* (scottbot.net, 2011-2021), which according to Google Scholar has been cited in over 300 books and articles. The blog was featured as an editors' choice 29 times on *Digital Humanities Now*, 19 times on *DH+Lib*, and 4 times on *Giant's Shoulders: A History of Science Carnival*. Introducing the inaugural issue of the journal *Computers & Culture*, editor James O'Sullivan noted that *the scottbot irregular* "made a significant contribution to the formation and development of the computational humanities and social sciences. It is not an embellishment to state that there was a time when many of us in DH

understood network analysis because of Scott Weingart's blog posts on the subject."

From 2015 onward, increasing managerial and administrative load translated to fewer publications and presentations. My scholarly production and participation further decreased with the birth of a child and subsequent paternity leave in 2021/2022. In 2023, my employment by the National Endowment for the Humanities rendered most of my remaining collaborative work and board participation conflicts of interest. While I still pursue research in my spare time, my attention is now focused on ensuring a healthy, active, and ethical research landscape in the United States and around the globe.

This Page
Intentionally
Left Sassy

Congratulations, dear reader. You reached y^e end. Your attentive eye has no doubt noticed y^s curriculum vitae's vnwarranted and excessiue self-indulgent fixation on archaic typography. In keeping with such pretensions, y^s document elaborates y^e details of its deuopment in y^e ftype of an Early Modern **colophon**.

I painstakingly typeset y^s document by hand, not out of loue for you but out of hatred for myself. Earlier versions were typeset vsing **L^AT_EX**. I euentually switched to Microsoft Word out of laziness and frustration, achieving the layout vsing a combination of tabbing and micro-futzed tables. The document is conuerted into PDF vsing Adobe Acrobat Pro, becaufe nothing says “forward-looking technologift” like shoving marked vp text into 8.5" x 11" PDF sheets.

The last **L^AT_EX**-encoded text in y^e document.

The medial s (f), letter transpositions (u/v and i/j, by their place in a word), non-lining numerals (o123456789), and abbreviations (y^e for ‘the’, y^t for ‘that’, and y^s for ‘this’), all present in early printing, appear only in y^s colophon (as a treat).

Glyphs appear in EB Garamond, an open-source implementation of y^e classic old-style serif typeface, vsing all standard, historical, and discretionary ligatures. All amperands appear in italic (℄), euen when y^e font does not match, becaufe they look swooshy and neat. Most lines are fully iustified, except those y^t are not.

This document vles fiue colors: #000000 (most text), #A6A6A6 (headers and footers), #808080 (marginalia), #AA610D (headings and highlights), and #724109 (to accent my name). I created y^e faux printer's device below vsing a custom fine-tuned generatiue diffusion model (fo-called “artificial intelligence”).
